

LAKSHMI MIRYALA

lmiryala1915@gmail.com ♦ [Linkedin](#) ♦ [portfolio](#) ♦ [Github](#) ♦ +61 493341290 ♦ Griffin, QLD

OBJECTIVE

Highly motivated, diligent student passionate about Programming, Generative AI, Machine Learning, Data Science, and Cloud technologies. Skilled in Python, SQL, Tableau, with strong understanding of data concepts. Eager to grow in AI consulting and develop smart, data-driven solutions using modern AI and cloud platforms.

EDUCATION

Queensland University of Technology, Brisbane

Expected 2027

Master of Data Science, CGPA: 6.25

Kalasalingam Academy of Research and Education, India

2021 - 2025

B.Tech/CSE - Data Science, 8.93 CGPA

SKILLS

• Python • SQL • Tableau • Generative AI • Machine learning • Deep learning • Data Structures • Data Analysis • Data Modeling • Linux • Git and Github • Problem solving

EXPERIENCE

Google Developer Student Clubs, Technical Lead

Jan 2023 - Apr 2024

- Established and fostered a positive and engaging developer community through workshops, hackathons, mentorship, and guidance on AI, cloud, and coding best practices aligned with AI consulting work.

MulticoreWare.Inc, Research Intern

Jul 2023 - Jun 2024

- Worked on “Design and Development of a vision-based Perception stack for Electric Vehicle deployed on the TDA4VM Device”.

ACADEMIC & PERSONAL PROJECTS

Posture Monitoring System using IMU and Raspberry Pi. Leveraged CNN architecture for analyzing IMU sensor data on Raspberry Pi, enabling real-time and precise posture monitoring. ([Click here](#))

Detecting Defects in Manufacturing Process. Utilized Deep Learning techniques with models like VGG16, ResNet50, ResNet101, MobileNet, and InceptionNet to detect defects. ([Click here](#))

Churn Prediction. Built models using Logistic Regression, Decision Trees, Random Forest, and SVM for customer churn prediction. ([Click here](#))

Indigenous Health Equity Analysis. Cleaned and transformed raw ABS health survey data in Excel, built five Tableau worksheets (heatmap, filled map, scatter plot, bar charts) with calculated fields and interactive filters, and assembled them into a policy-focused dashboard identifying chronic disease disparities and healthcare access barriers across remote Indigenous communities. ([Click here](#))

CERTIFICATIONS

- Machine Learning Specialization – Coursera
- Python Bootcamp – Udemy
